THE TITANIC

The Titanic was built in 1912. It was designed in a new way and it was thought to be unsinkable. Because of this, it wasn't given enough lifeboats for the passengers and crew. The hull was damaged by a collision with a huge iceberg and it sank very fast. A total of 1,513 people were drowned that day. Because of this disaster, **a lot of magazines were printed in many languages**, new international safety laws were passed and Ice Patrol was established. In 1985 the wreck was located on the sea bed and the ship was explored. Several successful films have been made about the Titanic since then.

Answer the questions:

1. Have you seen the film?

2. Would you like to be on the Titanic?

3. Try to find out some basic facts about the Titanic.

Answer key

Now, Make Popcorn!

Popcorn is something you often eat when you watch a movie at a cinema. It is very easy to make perfect popcorn if you follow the correct process. I will outline it below.

The first step is that three tablespoons of oil are put in a large pot. Next, the pot is placed on the stove and the oil is heated on a high flame. Next, one kernel of popcorn is added. After this kernel pops, a quarter cup of popcorn is put into the pot. The pot is covered with a lid. In the next stage, the flame is reduced and the pot is gently shaken until the corn pops. Then the pot is removed from the stove, which is turned off. Finally, the popcorn is emptied into a large bowl, where melted butter and salt are added.

In summary, making popcorn is very easy if you follow the steps above. Enjoy your movie and your popcorn!

Want Coffee?

Coffee is a very popular drink around the world. People drink it at all times of the day. There are several kinds of coffee, but I am now going to describe how instant coffee is produced.

First, the coffee beans are picked from the trees and dried in the sun. Then, the beans are roasted and then cooled rapidly before being ground. The beans are then mixed with hot water and the mixture is strained before it is frozen. Finally, the frozen mixture is ground and then dried in a vacuum before it is packed into jars. The coffee is now ready to be sold in shops.

Instant coffee is not quite as good as real coffee, but it is very popular and saves a lot of time. The manufacturers have done most of the steps for us!
